---

## Education

Ph.D. in Physics, University of Colorado, 2022

B.S. in Physics, *Summa Cum Laude*, Northern Arizona University, 2013

B.S.E. in Electrical Engineering, *Summa Cum Laude*, Northern Arizona University, 2013

---

## Research Experience

July 2022 – Present: **Cornell University**. *Postdoctoral Associate, Aerospace Engineering*

- Developed electrospray ionization sources for time-of-flight mass spectrometry
- Designed and fabricated: a precision laser alignment system for a time-of-flight system, an assembly for precise in-vacuo yaw and pitch control of an ion beam, a downstream current measuring device, and a heated electrospray source
- Managed graduate and undergraduate students

2015 – June 2022: **University of Colorado at Boulder**. *Graduate Research Assistant*

- Designed and performed time-of-flight mass spectroscopy studies of hypervelocity plasma plumes from dust impacts into a cryogenic target
- Determined the “speed limit” of spacecraft for hypervelocity organic studies
- Operated the Colorado Dust Accelerator for a number of space instruments
- Managed and rebuilt the Dust Accelerator data acquisition pipeline

2014 – 2016: **University of Colorado at Boulder**. *Graduate Research Assistant*

- Set up a high current, large aperture plasma source to simulate solar wind interaction. Built and used a *Langmuir probe* and a *retarding potential analyzer*

2013: **University of Colorado at Boulder**. *Research Experience for Undergrads Student*

- Assembled and tested a dust position sensor for the Colorado Dust Accelerator

2012: **Cornell University**. *Research Experience for Undergrads Student*

- Built and characterized a laser oscillator for the Energy Recovery Linac Project

2012: **Northern Arizona University**. *Undergrad engineering design project team leader*

- Led a team of five other undergrad engineers on a project to design a \$30,000 renewable energy system for Moencopi Day School on the Navajo Nation

---

## Experience and Skills

- **Technical:** Design of Experiments, Ultra-High Vacuums, Mass Spectrometry, Hypervelocity Ionization, Vacuum Cryogenic Hardware Design, Machining, Computer Control Systems, Data Acquisition, Laboratory Troubleshooting
- **Software:** SolidWorks, LabVIEW, Eagle PCB Design, PCB Artist, GIT, Adobe Illustrator/Photoshop/Premiere/Lightroom. Ran IT/networking and data acquisition pipeline for the Colorado Dust Accelerator.
- **Programming:** Python, LabVIEW, HTML, C, VHDL
- **Project Management:** Lead organizer of [LunGradCon](#) 2017-2021 (team of 5), Founder/lead organizer of [Public Works](#) 2022-2023 (team of 4), Managed undergrad and grad student projects at both Cornell and Boulder
- **Communication:** 22 conference presentations (11 oral, 11 posters) across USA, Europe, and Asia. 2x NASA Exploration Science Forum poster awards.

## Selected Awards and Honors

---

- NASA Exploration Science Forum Poster Award, Second Place (2018)
- NASA Exploration Science Forum Poster Award, Third Place (2017)
- Lowell Prize - Given to a single outstanding student from the College of Forestry, Engineering, and Natural Sciences at NAU (2014)
- Adel Scholar Award- Given to a single outstanding NAU physics student (2013)

## Publications

---

- Z. Ulibarri, M. Voss, T. Munsat, S. Kempf, M. Horányi, and Z. Sternovsky. "Detection of the amino acid histidine and its breakup products in hypervelocity impact ice spectra." *Icarus* (2023): 115319.

## Selected Invited Colloquia

---

### NASA Jet Propulsion Laboratory Planetary Science Seminar - March 2022.

Measurement of the Amino Acid Histidine and its Breakup Products in Hypervelocity Dust-Ice Impact Mass Spectra.

## Misc.

---

Rode a bicycle solo across North America. Solo travelled to India's border with Tibet and to Angkor Wat. Hobbyist woodworker. OSHA/ASME certified crane operator.
